Break Bulk Platform, a powerful and flexible tech for your business.

Benefits

- Supports and systematize the break bulk handling process.
- Provides a mobile user-friendly solution for yard operations.
- Integrates with the TOS and the terminal ecosystem.

A solution that optimizes critical yard operations, saving significant time and costs during the break bulk handling.

Break Bulk

Features Details

1 Stowplan for cargo discharge

- **Pain:** stowplan information lacks of TOS support during the cargo discharge.
- **Details:** the stowplan is generated from announced cargo simplifying the discharge process.

2 Sales agreement fulfilment

- **Pain:** the special services and business workflows arising from sales agreement need to be fulfill.
- **Details:** Break Bulk Platform can be customized to support all the business constraints.

3 Cargo tagging for internal trace

- **Pain:** heterogeneous tags use by cargo shippers (i.e. handwritten or not waterproof) makes it harder to trace the cargo along the terminal facilities.
- **Details:** Break Bulk Platform allows to tag uniformly the cargo in such a way its recognition becomes easy.

4 Damages and inspection recording

- **Pain:** any cargo damages or provided services need to be documented.
- **Details:** images and videos can be attached to work tasks so that a report can be automatically sent at the end of the shift.

5 Cargo management

- **Pain:** the cargo may need to be staffed and split into/from a container, relocated during its stowing, etc.
- **Details:** all the basic cargo management actions are supported by this tool.

6 Operations-focused solution

- **Pain:** the available tools do not adapt properly to operator's needs being detriment to his performance.
- **Details:** the tool allows proficient cargo's information management by simplifying those complex tasks.

Give support to your business with **Break Bulk Platform**.
